Portfolio

EDUCATION

University of Westminster	Colombo, Sri Lanka	May 2021
Bachelor of Science in Computer Science (First Class Honors)		
Cardiff Metropolitan University	Colombo, Sri Lanka	Nov 2017
Higher National Diploma in Computing and Software Engineering (Honors)		
Diploma in Information and Communication Technology (Distinction)		

WORK EXPERIENCE – 2 years

Gapstars	Colombo, Sri Lanka	Nov 2021 – Present
Senior Software Engineer		
- Refactored and restructured an Angular project that was initially developed by interns, and migrated the angular version from version 6 to version 12 and wrote unit tests using Jest testing framework. - Researched and developed a web application using Web components and Vue.js that was reused across different pages and frameworks. - Researched and developed a Progressive Web App(PWA) using Web components, Vue.js and Workbox service worker that resulted in high client satisfaction.		
99x	Colombo, Sri Lanka	July 2021 – Nov 2021
Software Engineer		
Developed web applications with both frontend technologies – React, Angular, Angular Web Components, Knockout.js and backend technologies – C#, ASP .NET, ASP .NET Core Web API as a Full stack developer.		
iTelaSoft	Colombo, Sri Lanka	July 2019 – Sept 2020
Software Developer Consultant - Contract		July 2020 – Sept 2020
- Trained and supervised 5 new team members and assisted them in becoming familiar with the programming languages utilized within the company - Troubleshoot emergent bugs in the production environment such as authorization errors, google map integration issues, and pagination issues - Proposed an innovative design solution for an onboarding process on a time sensitive project that resulted in high client satisfaction		
Software Engineering Intern		July 2019 – July 2020
- Researched and familiarized programming languages and material design frameworks – Vue.js, Nuxt.js, C#, ASP .NET core, AWS, Vuetify, and BootstrapVue - utilized by the company in developing full-stack web applications, and passed an assessment testing knowledge in these programming languages - Collaborated with team members on 4 projects that required assessing and delivering the needs of the clients - Attended regular meetings with clients and company executives to obtain feedback and ensure the quality of the product		

TECHNICAL SKILLS

Programming: C# • Java • Python • C++ • Swift • React Native • React • Next.js • Angular • Flutter • NodeJS
Knockout.js • HTML • CSS • JavaScript • Nuxt.js • Vue.js • AWS • ASP.NET Core • MongoDB
SQL • JQuery

Software: Visual Studio • Visual Studio Code • Git • GitHub • Bitbucket • GitLab • Unity • Unreal Engine
Adobe XD • Photoshop • Premiere Pro

RELATED PROJECTS

MamaMoods May 2021

Researched and developed a Serious Game called MamaMoods using Unity Game Engine that helps to raise awareness on Antenatal Mental Health among the society by letting the player play and learn through the game itself. It also helps to identify the symptoms and solutions to live a healthy life. This game was developed for my *Final Year Project* and all the information in the game was validated by a Mental health counselor.

Key Technologies: **C#, Unity, Mixamo**

Spending Management Application April 2021

Developed an iPad application, for managing expenditure as a requirement for the Mobile Native Application Development module. Core data storage was chosen over the UserDefaults storage.

Key Technologies: **Swift with Core Data persistent storage**

Price Finder Application September 2019

Programmed an android application, in a group of 5, which predicts the second-hand market value of a used mobile phone, to fulfill the course requirement for the Software Development Group Project.

Key Technologies: **React Native, Python, Firebase, Azure, AWS, Machine learning, Image Processing, NLP**

Greeners Nov 2018

Created a prototype android application, in a group of 5, that provided a platform to obtain the resources and services necessary for a self-sufficient urban gardener, by surveying agricultural experts and social networks. This prototype was awarded 2nd runners-up in *Yarl Geek Challenge Season 7*, a Hackathon conducted by the Yarl IT Hub.

Key Technologies: **Android Studio, Java**

Smart Bin June 2018

Collaborated with 4 group members to program the software for an IoT device that identifies the type of garbage and sorts them for recycling purposes. This project was entered to the *Cutting Edge Innovative Projects Exhibition 2018* held at BMICH in Colombo, Sri Lanka, and was selected to the final round.

Key Technologies: **Python, Arduino, Image Processing, Android Studio**

AWARDS & CERTIFICATIONS

- National ICT Awards: *NBQSA Tertiary project* – **Merit Award** Jan 2022
- Cutting Edge Awards: *Final year best project* – **Bronze Award** July 2021
- Artificial Intelligence Foundations: Machine Learning | *Linkedin learning* Sept 2020
- Introduction to Game Design | *Coursera* Jun 2020
- AWS Fundamentals: Going Cloud-Native | *Coursera* May 2020
- Crash Course on Python | *Coursera* May 2020
- *Yarl Geek Challenge Season Awards* – **2nd Runners-up** Nov 2018
