| <ul style="list-style-type: none"><li>• Researched and familiarized programming languages and material design frameworks – <b>Vue.js</b>, <b>Nuxt.js</b>, <b>C#</b>, <b>ASP .NET core</b>, <b>AWS</b>, <b>Vuetify</b>, and <b>BootstrapVue</b> - utilized by the company in developing full-stack web applications, and passed an assessment testing knowledge in these programming languages</li><li>• Collaborated with team members on 4 projects that required assessing and delivering the needs of the clients</li><li>• Attended regular meetings with clients and company executives to obtain feedback and ensure the quality of the product</li></ul> |                    |                       |

## TECHNICAL SKILLS

---

**Programming:** HTML • CSS • JavaScript • TypeScript • JQuery • Angular • React • Next.js • Vue.js • Nuxt.js  
Node.js • Express.js • React Native • Flutter • MongoDB • GraphQL

**Tools:** Visual Studio • Visual Studio Code • Git • GitHub • Bitbucket • GitLab • Unity • Unreal Engine  
Adobe XD • Photoshop • Premiere Pro

## PROJECTS

---

### Research Project Management Tool June 2022

Developed a Research Project Management website using MERN stack that helps universities manage their students research projects. This website has Admin, Staff and Student portals with specific access based on their user role. Students and staffs will also be able to communicate using an in-built forum. Staffs and admins will be able to create notices with attachments and upload sample presentation templates. This website was developed as a Freelance project.

*Key Technologies:* **MongoDB, Express, React, Node, Tailwind**

### MamaMoods May 2021

Researched and developed a Serious Game called MamaMoods using Unity Game Engine that helps to raise awareness on Antenatal Mental Health among the society by letting the player play and learn through the game itself. It also helps to identify the symptoms and solutions to live a healthy life. This game was developed for my *Final Year Project* and all the information in the game was validated by a Mental health counselor.

*Key Technologies:* **C#, Unity, Mixamo**

### Spending Management Application April 2020

Developed an iPad application, for managing expenditure as a requirement for the Mobile Native Application Development module. Core data storage was chosen over the UserDefaults storage.

*Key Technologies:* **Swift with Core Data persistent storage**

### Price Finder Application September 2019

Programmed an android application, in a group of 5, which predicts the second-hand market value of a used mobile phone, to fulfill the course requirement for the Software Development Group Project.

*Key Technologies:* **React Native, Python, Firebase, Azure, AWS, Machine learning, Image Processing, NLP**

### Greeners Nov 2018

Created a prototype android application, in a group of 5, that provided a platform to obtain the resources and services necessary for a self-sufficient urban gardener, by surveying agricultural experts and social networks. This prototype was awarded 2<sup>nd</sup> runners-up in *Yarl Geek Challenge Season 7*, a Hackathon conducted by the Yarl IT Hub.

*Key Technologies:* **Android Studio, Java**

## AWARDS & CERTIFICATIONS

---

- National ICT Awards: *NBQSA Tertiary project* – **Merit Award** Jan 2022
- Cutting Edge Awards: *Final year best project* – **Bronze Award** July 2021
- Artificial Intelligence Foundations: Machine Learning | *Linkedin learning* Sept 2020
- Introduction to Game Design | *Coursera* Jun 2020
- AWS Fundamentals: Going Cloud-Native | *Coursera* May 2020
- Crash Course on Python | *Coursera* May 2020
- *Yarl Geek Challenge Season Awards* – **2<sup>nd</sup> Runners-up** Nov 2018
