Portfolio

PROFESSIONAL SUMMARY

Creative and experienced Front-end Developer with over 4 years of experience crafting responsive web applications, including a wide range of client-facing projects with fully functional admin portals.

Known for building scalable internal tools and clean, maintainable code using modern JavaScript and CSS frameworks. Deeply passionate about development, constantly exploring emerging technologies and UI/UX trends to stay ahead of the curve. Skilled at turning complex requirements into intuitive, high-performing interfaces that enhance user experience and deliver business value. A proactive collaborator focused on quality, innovation, and high client satisfaction.

WORK EXPERIENCE

4+ years

Stekz (Media2B B.V)

Frontend Developer

Nov 2021 - Present

- Pioneered modern Vue.js architecture for client project, integrating PrimeVue, Pinia, VeeValidate, and Vue I18n while implementing 'Unplugin Vue Router' for type-safe, file-based routing, resulting in 40% faster development and debugging cycles
- Reduced tree view rendering from $O(n)$ to $O(k)$ complexity through UX-driven solution, implementing breadcrumb-based progressive disclosure that improved load time by 95% for deeply nested data.
- Researched and integrated AG-Grid for performance-critical table with row-level validation, efficiently handling large-scale data operations, resulting in high client satisfaction
- Provided Figma design support to developers and Project managers, streamlining design-to-development handoff and team workflows
- Gathered requirements in client meetings and delivered Figma designs that enhanced stakeholder alignment and accelerated development
- Designed and implemented a mobile responsive scanning application tailored to client workflows that improved operational efficiency by 80%
- Researched, designed, and built a framework agnostic component library using Web Components and Lit.js that was successfully integrated across various internal and external projects, streamlining UI development and ensuring consistency
- Led the design and development of a complex quote and order processing page. Focused on creating an intuitive user experience that streamlined operations and enhanced user satisfaction

iTelasoft (Pvt) Ltd.

Software Developer

Jul 2019 - Nov 2021

- Trained and supervised 5 new team members and assisted them in becoming familiar with the programming languages utilized within the company.
- Refactored and restructured an Angular project that was initially developed by interns.
- Troubleshoot emergent bugs in the production environment such as authorization errors, Google Map integration issues, and pagination issues.
- Proposed UX-driven design solution for onboarding process on time-sensitive project, resulting in high client satisfaction
- Self-taught company's tech stack spanning frontend (Vue.js, Nuxt.js, Vuetify, BootstrapVue) to backend (C#, ASP.NET Core, AWS), demonstrating competency through formal assessment
- Gained React proficiency through team collaboration on client projects, delivering solutions aligned with requirements

EDUCATION

- | | |
|--|----------|
| • B.Sc (Hons) in Computer Science University of Westminster | May 2021 |
